## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 29 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6687683 to Harada et al.

Although the conflicting claims are not identical, they are not patentably distinct from each other. Claim 1 of U.S. Patent No. 6687683 recites all the limitations of claim 29; however, claim 1 of US Patent No. 6687683 differs since it further recites additional claim limitations including "wherein the obtaining means and the first content description means are realized by a personal computer that executes software for decrypting contents, and the second content description means is realized by one of tamperproof hardware and an apparatus that executes tamperproof software". However, it would have been obvious to a person of ordinary skill in the art to modify claim 1 of U.S. Patent No. 6687683 by removing the additional limitations, resulting generally in the claims of the present application, since the claims of the present application and the claim recited in U.S. Patent No. 6687683 actually perform a similar function. It is well

Art Unit: 3621

settled that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. In re Karison, 136 USPQ 184 (CCPA 1963).

Also note Ex parte Rainu, 168 USPQ 375 (Bd. App. 1969). Thus, omission of a reference element whose function is not needed would be obvious to one of ordinary skill in the art.

***Allowable Subject Matter***

3. Claims 30-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
